News Brief

Milwaukee Deploys 4.9 GHz Network (2/26)

Wi4Net, a division of CelPlan Technologies, and Pivot3 announced that the city of Milwaukee chose Wi4Net for the provision and deployment of wireless surveillance cameras and a network monitoring facility.

The first phase of the project includes a wireless 4.9 GHz-based backhaul network throughout the city's 97 square miles. Initially connecting 15 cameras, the network is designed to scale to more than a hundred cameras in the future. Video is streamed to a centralized monitoring center, including a highly scalable storage solution from Pivot3 equipped with 18 terabytes of raw storage capacity.
